

HP360-AL

ALUMINUM

HP360-AL is a proprietary HEPA grade ePTFE membrane and is Thermal-Bonded to a Toray Bi-Component Polyester Spunbond with an aluminum anti-static coating sandwiched between them. This E11 HEPA membrane is formed without solvents, chemicals or binders. The unique Relaxed Membrane is bonded to the up-flow side that makes this media a one-of-a-kind in the filtration industry. The bonding process is engineered so the membrane and aluminum coating will not rupture or break down during the pleating process.

FEATURES

- 2 Weights Available: 130 GSM & 260 GSM
- Chemical Resistant, Anti-Salt membrane
- 100% Hydrophobic
- High Efficiency E11
- Washable
- Low Pressure Drop (up to 40% lower)

APPLICATIONS

- Industrial Air Filtration
- Welding (Laser, Plasma)
- Stainless Steel Welding
- Pharmaceuticals
- Plating
- Food Processing
- Powder Coating
- Cement
